Excavators

SPOONS: For Removal of Carious Dentin

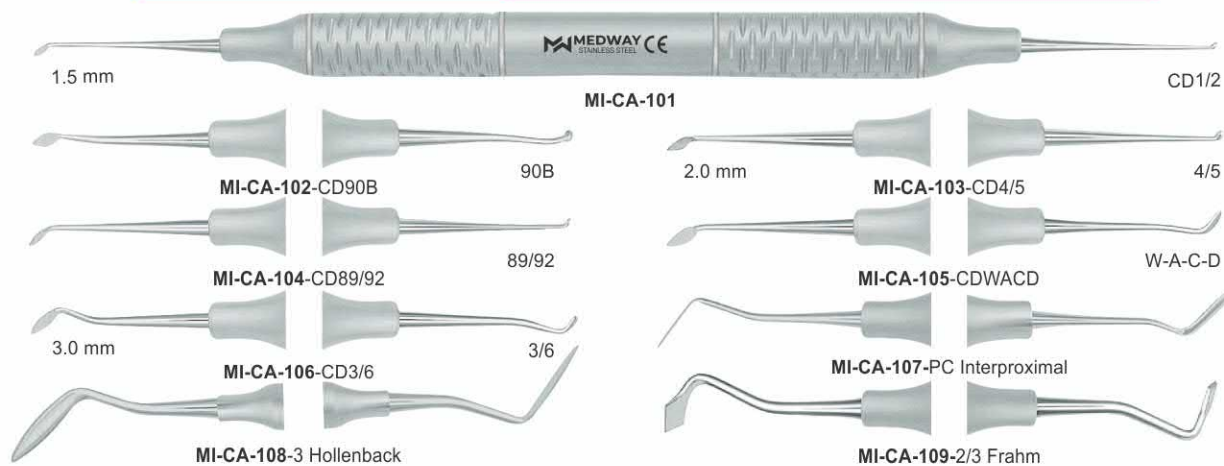

Pluggers / Condensers

Used to Pack Filling Materials into Cavity Preparations

CARVERS

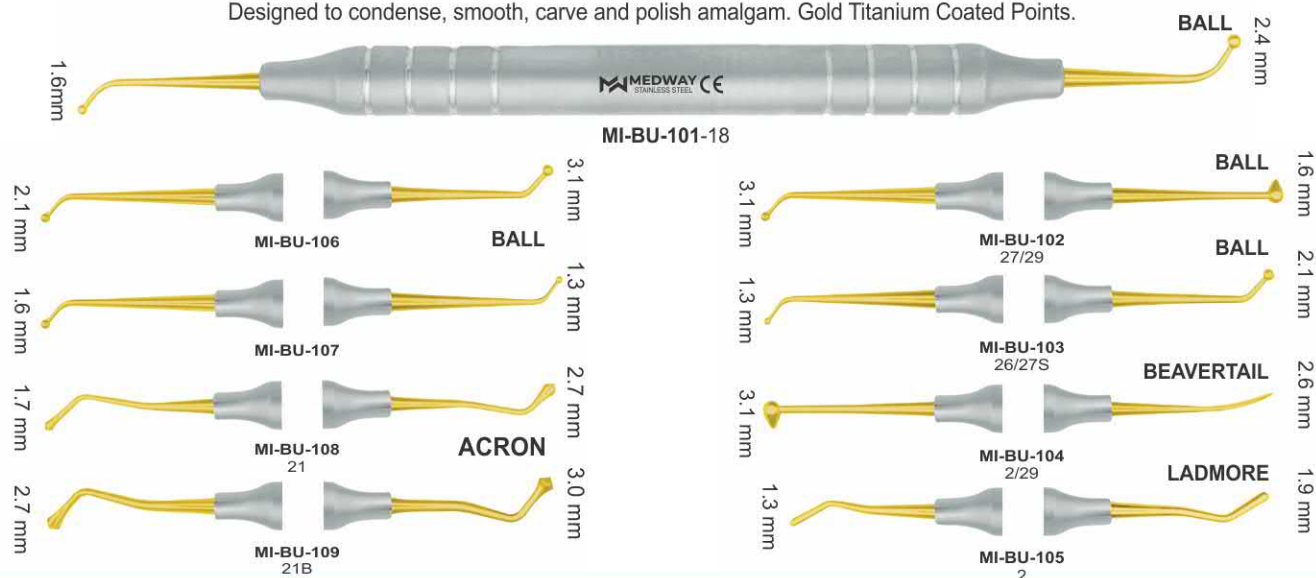

Used to Crave anatomical features and trim excess materials.

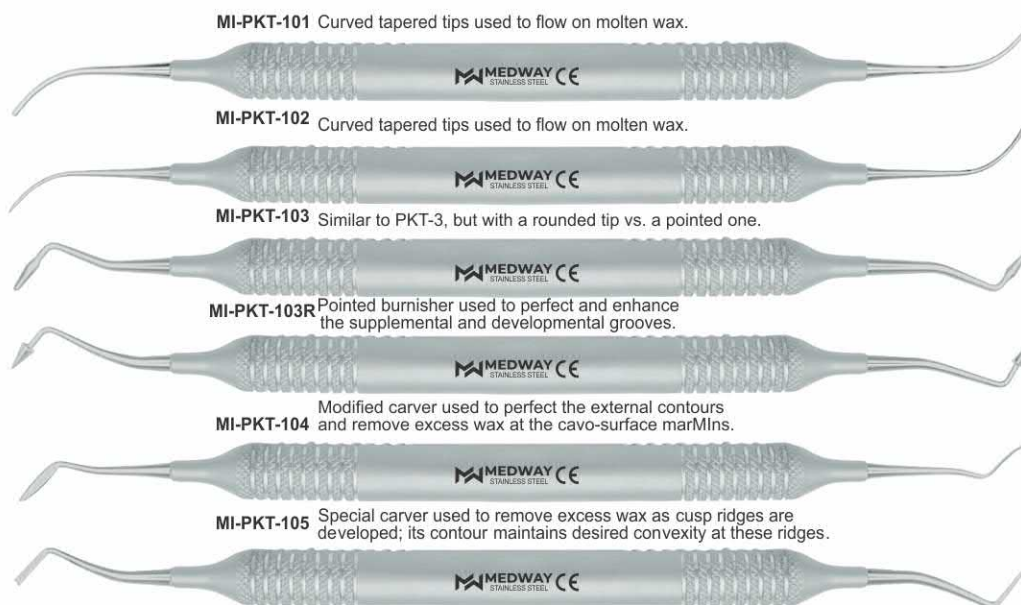

Burnishers

Designed to condense, smooth, carve and polish amalgam. Gold Titanium Coated Points.

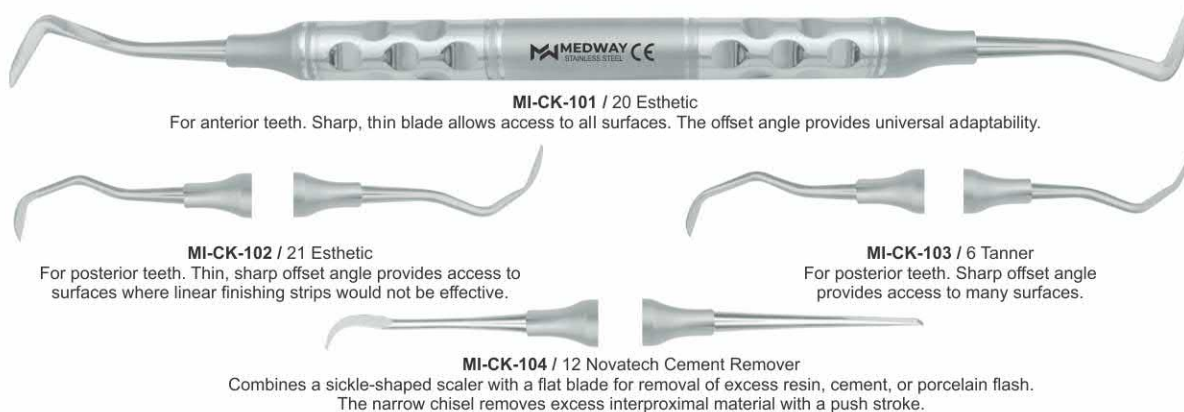

PK-Thomas

Used for waxing procedures and techniques.

Carving Knives

Used for trimming excess filling material, flash and overhangs.

Cord Packing Instruments

For atraumatic and accurate cord placement.

MI-CPI-101 / BN1

Thin blade and rounded contour facilitates use in both thick and thin tissues without catching or dropping cord. Bilateral notch allows placement in limited access areas.

MI-CPI-102 / 1 Yardley
Round non-serrated working end.

Serrated

MI-CPI-103
CSI-1

Non-Serrated

MI-CPI-104 - 7 Guyer

Sickle Scalers

Designed for removal of supraMInMlval calculus.

MI-SC-101

Contra angle design offers greater access to distal surfaces

MI-SC-102 / H6/H7

Super-thin, contra angle design is for interproximal areas. Shank angulation provides accessibility to all anterior and premolar surfaces

MI-SC-103

H5/U15
HyMlenist-Towner

MI-SC-104 / H5/33 - HyMlenist-Jacquette

Super-thin sickle scaler combined with a straight sickle blade. For scaling interproximal and cervical areas of anterior teeth.

Barnhart

Periodontal Files

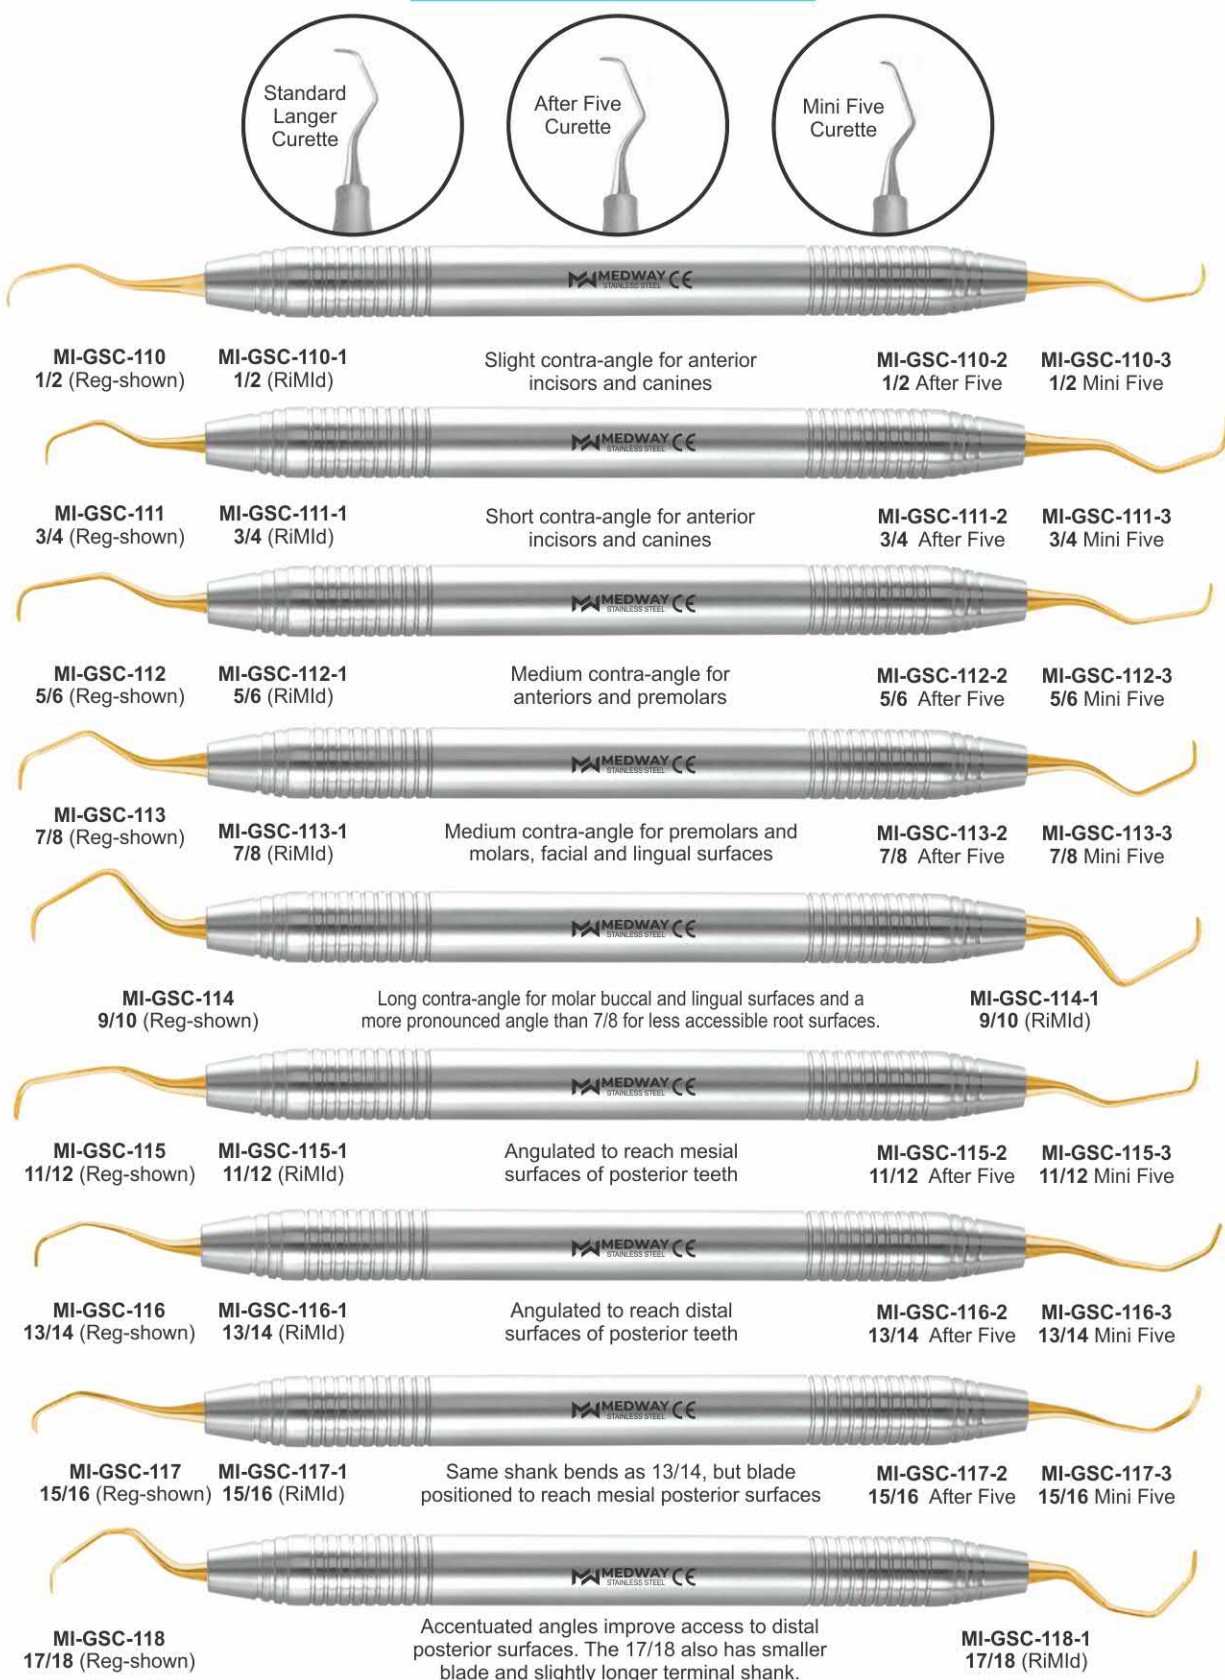

Goldman-Fox

- Area-specific to allow for deep scaling, root planing and periodontal debridement
- Offset blade provides a perfect working angulation for the tooth surface
- Offset blade angulation means only the lower cutting edge of each blade is used

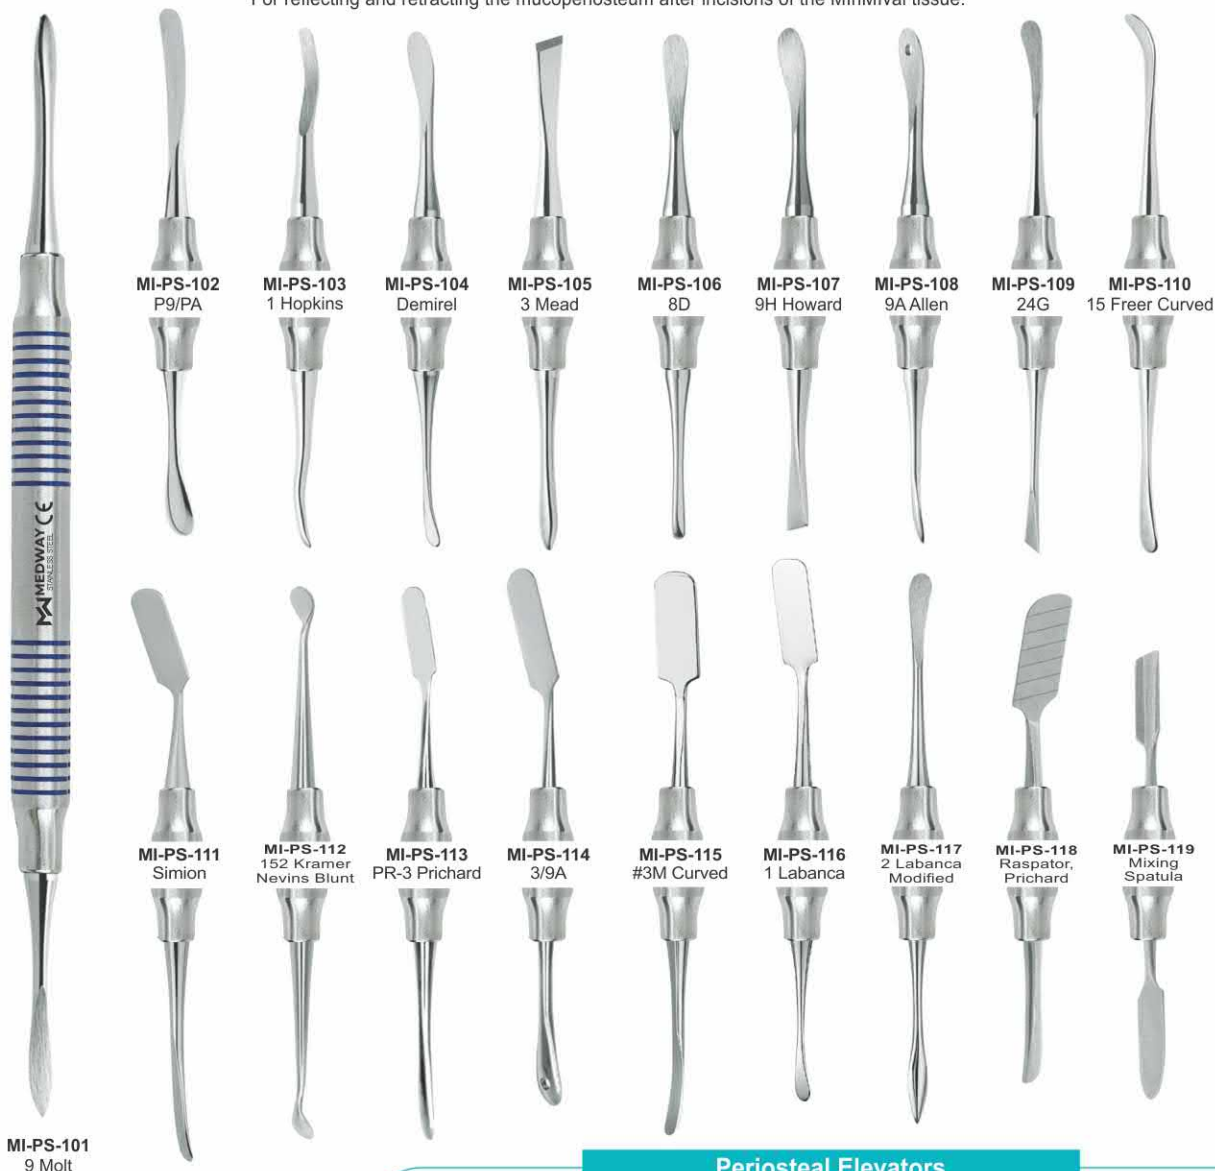

Gracey Standard Curettes

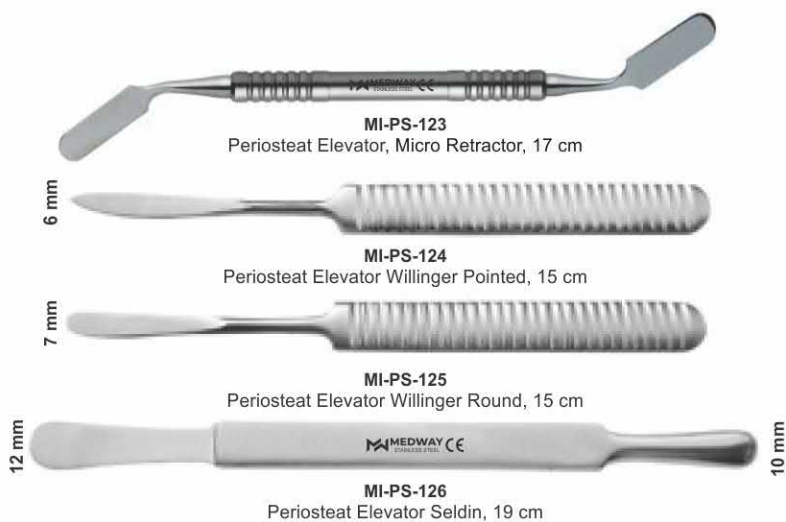

Periosteals

For reflecting and retracting the mucoperiosteum after incisions of the MInMlval tissue.

Periosteal Elevators

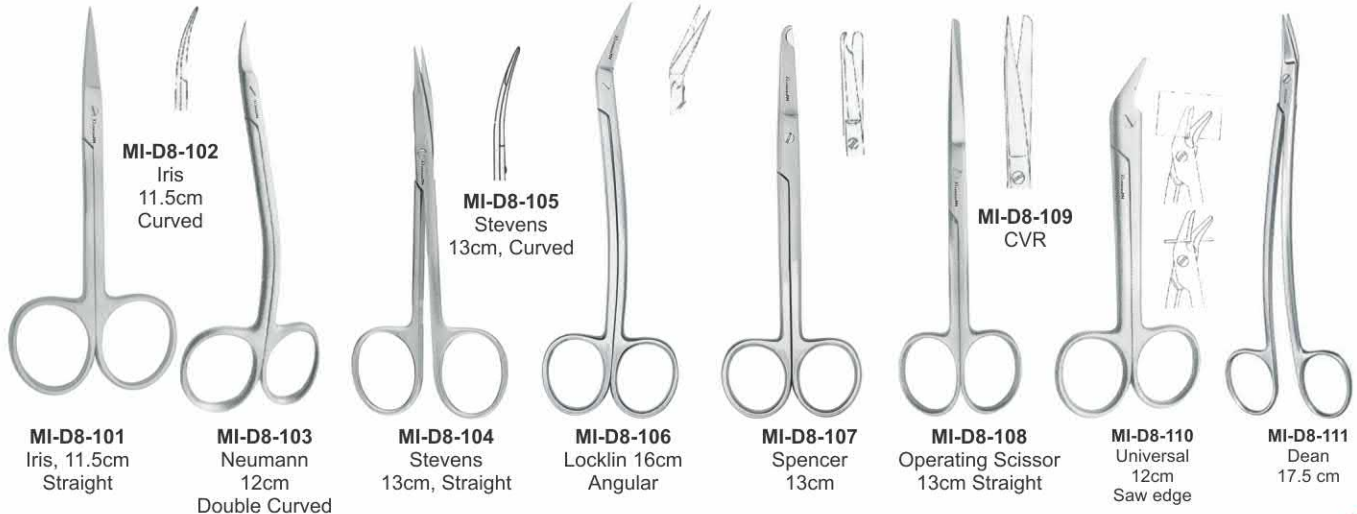

Dental Scissors

- Scissors designed for suture removal.
- Blades – one has a curved edge and one has a notched edge.
- During suture removal, suture is scooped up by blade with the notched end before cutting to prevent tissue trauma.

General Scissors

Scissors Tungsten Carbide & Micro Serrated Super Cut Scissors

Tungsten Carbide scissors feature cutting edges of permanently welded Tungsten carbide inside. These Scissors will retain a fine sharp cutting edge for long time and will outlast any standard stainless steel dental scissors. Both handles are gold-plated for easy identification.

T.C Super Cut Scissors

Tungsten carbide inside, One Blade Micro Serrated

Tweezers are used particularly to handle and place cotton pellets, wedges and articulation Tweezers are important Dental Lab Equipment, made of non-magnetic stainless steel. They are designed particularly to hold the tiniest article, provide better grip on the jaw.

Micro Tissue Forceps

Suture Forceps

MEDWAY INS Needle holders feature tungsten carbide inserts with a matched diamond-cut pyramidal profile for enhanced longevity, a secure, positive suture needle grasp and reduced risk of cutting the suture material. With a precision designed hinge, the smooth surface reduces the risk of catching and or cutting the suture material during the knot tying process, enhancing clinical efficiencies. For optimal grip and control, **MEDWAY INS** offers a variety of design options, including standard, finger and palm controlled closure.

Bracket Positioning Boons Gauge

MI-D27-101

- It Is The Most Frequently Used Bracket Positioning Aid.
- It Is Made Of Stainless Steel.
- It Accurately Measures Height Of Bracket Placement From The Incisal Edge At 3.5, 4, 4.5 And 5mm.
- Flat Surface Rests On Incisal/occlusal Surface Of Tooth. Simplify Seating The Bracket On The Teeth With Exactly The Right Distance Between Bracket Dot And Incisal Edge With Pencil Lid Or Metal Tips.

Uses of Articulator

Primary purpose:

- 1) To hold opposing casts in a predetermined fixed relationship
- 2) To open and close.
- 3) To produce border and inter-border diagnostic sliding motions of the teeth similar to these in the mouth.

MI-DAR-1001
Technical Datas:

Intercondylar distance 120 mm. / condylar inclination fixed at 30°
Bennet angle fixed at 7° / Incisal table inclination 10°
Distance between mounting plates 85 mm. / Weight 400 gr.
Opening 180°
